

Setup

Install docker-compose

Start the server

1. Navigate to the program directory using the terminal(if using Windows open it using administrator)
2. Run:

If using Linux OS:

```
sudo docker-compose up
```

If using Windows:

```
docker-compose up
```

3. Now your:
 - web server should be running at localhost:8001
 - The admin login is:
 - Username: `admin`
 - Password: `admin`
 - phpmyadmin at localhost:8000
 - The login for the administrator is:
 - Username: `astroweather`
 - Password: `astroweather`
4. To stop the servers press `Ctrl+C` on the terminal.
