Setup

Install docker-compose

Start the server

1. Navigate to the program directory using the terminal(if using Windows open it using administrator)

2. Run:

   If using Linux OS:

   ```
   sudo docker-compose up
   ```

If using Windows:

```
docker-compose up
```

3. Now your:
   - web server should be running at localhost:8001
     - The admin login is:
     - Username: `admin`
     - Password: `admin`
   - phpmyadmin at localhost:8000
     - The login for the administrator is:
     - Username: `astroweather`
     - Password: `astroweather`
4. To stop the servers press `Ctrl+C` on the terminal.
